

ZeCA Certification Exam Voucher

Zentyal Certified Associate

The Zentyal Certified Associate (ZeCA) certification validates the knowledge necessary to manage a Zentyal Server deployment in a business environment.

Competencies

- General knowledge of networks and Linux
- Zentyal Server architecture
- Zentyal as a Infrastructure server
- Zentyal as a Firewall
- Zentyal as a Domain & Directory server
- Zentyal as a Communications server

Exam details

- Type of questions: Multiple choice, matching, short answer
- Number of questions: Approx. 40
- Duration of the exam: 60 minutes
- Passing of the exam: A score of 70% or above is needed to pass the exam

Who should take the exam

IT professionals interested in deploying Zentyal as a corporate server and who want to validate their Zentyal knowledge with vendor-certified exam.

Prerequisites

There are no prerequisites for enrolling in the ZeCA exam. The official on-line training courses are the recommended training to prepare for it. In addition, the official Zentyal book helps prepare for this exam.

Zentyal Certified Associate (ZeCA) Status

Those who pass the certification exam will be granted the status of Zentyal Certified Associate (ZeCA) and will be included in the official database of certified professionals. The Zentyal Certified Associate certificate includes a reference number that allows the certified person to access the details of their certification as well as to use it as an official reference to have obtained the certification.
